ABOUT VADODARA

Modern Vadodara is a great and fitting memorial to its late ruler Sir Sayaji Rao Gaekwad III (1875 – 1939 AD). It was the dream of this able administrator to make Vadodara an educational, industrial, commercial and cultural centre and he ensured that his dream would come true.

It was he who visualized a general scheme of development in all branches of knowledge at different stages, with the Maharaja Sayajirao University of Baroda at the apex. Modern Baroda owes its beauty, its educational institutions and its masterpieces of architecture to the insight and vision of this great ruler. Vadodara is a graceful city of palaces, parks, temples and museums. Vadodara is an important city in Gujarat. Till the 1960s, it was known as a cultural and educational centre. However, presently, the city has emerged as an important industrial and commercial hub of the state.

ABOUT IIMM

“Indian Institute of Materials Management (IIMM)” with its Headquarters at Navi Mumbai, is the National Apex body representing a wide spectrum of professionals engaged in various facets of Material Management, responsible for planning, sourcing, logistics and supply chain management.

IIMM has a wide network of more than 50 branches having over 10000 plus members drawn from public and private sectors. To have more effective global interaction, institute is a chartered member of International Federation of Purchasing and Supply Management (IFPSM), Atlanta (USA) incorporated in Switzerland, which has its members in over 46 countries.

ABOUT NATCOM

The NATCOM is a flagship event of IIMM. This event helps in creating the winning organization through an effective supply chain excellence and increasing their competitive and a winning combination or advantage through value addition while reducing regular cost. The two-day program attempts to share the latest global trends in the field of Supply Chain Management. Through this event one can listen to various views of industries and functional experts and thinkers, leaders and deliberate on how SCM professionals together can contribute to enhanced knowledge and capability that is important towards creating an organization is end of the objective. The Indian Institute of Materials Management through this conference is providing a strong platform for all organizations and individuals to be able to interact and exchange key contributions in the field of expertise. The two days National Convention 2021 will be in hybrid Virtual Model with limited delegates /invited guests on premise as per the guidelines announced by the Government. Looking at the current pandemic situation NEC members, NC and past Presidents of IIMM are invited to attend the NATCOM in physical form. According to the guidelines laid by government it is mandatory for all the delegates/ invited guests attending the NATCOM 21 in physical mode to be fully vaccinated (Covid Vaccination).

SIGNIFICANCE OF NATCOM 2021 – THEME

“The world is moving so fast now-a-days that the man who says it cannot be done is generally interrupted by someone else doing it.”

It is generally accepted that sustainable development calls for a convergence between the three pillars of economic development, social equity, and environmental protection. Sustainable development is a visionary development paradigm; and currently governments, businesses, and civil society have accepted sustainable development as a guiding principle and made progress on sustainable development metrics. The NATCOM 2021 theme “Role of Disruptive Technologies in reshaping SCM – “Atmanirbhar se Atmasanman tak” is a step towards this thinking. This will provide a new vision for competitive advantage for the MSME sector which has seen an exponential growth over the last decade. NATCOM 2021 will provide information, practical skills, and even networking opportunities through of all forward thinking CEOs, CFOs, COOs, CPOs, and SCM professionals, including business developers, management executives and vice presidents from manufacturing and service industry. The session and the topics are planned in a manner that participants derive maximum benefits from the outcome of the deliberations.

Global supply chains truly relate to the above statement as they are evolving at a faster rate than at any point in history. Staying competitive in supply chain management requires adopting the advanced and innovative technology widely called as disruptive technologies. The technologies such as Internet of Things (IOT), Big Data, Cloud Computing, Artificial Intelligence, Machine Learning, Blockchain are disruptive technologies making a splash in supply chain industry. Disruptive technology shakes up a supply chain and has the potential to completely change how products are manufactured, distributed, and tracked.

India’s supply chain and logistics sector is one of the largest globally. The sector has the potential to grow multifold.

The COVID-19 pandemic has magnified supply chain weaknesses, with nearly 75 percent of companies worldwide experiencing disruptions. These disruptive events pushed decision-makers to reimagine the country’s supply chain management.

This is the moment for the Indian supply chain and logistics sector to reconfigure and redesign supply chains with greater thought to disruptive technologies and risk management and make a pathway from “Atmanirbhar to Atmasamnam”.

Aligning the theme of NATCOM 2021 with the progressive city of Gujarat ‘Vadodara’, listed are the proposed technical session topics.

1. Disruptive technologies – what is missing?
2. Sustainable procurement and supply chain practices in the 21st century.
3. Building Atmanirbhar culture and response in Supply chain
4. Building the agility and resilience in supply chain by adopting advanced technologies.
5. Use of disruptive technologies – an alternate mode for energy distribution.
6. Digitization of public procurement – Best Practices.
7. Redefining the role of procurement and supply chain managers in corporate leadership.
8. Blockchain technology and productivity ends in global supply chains
9. Bigdata, Analytics AI and Machine learning – what are the opportunities for procurement and supply chain professionals?
10. Trending innovations in international logistics management
11. Green supply chain for a sustainable world
12. Trends shaping the future of supply chain
13. Building the world class manufacturing supply chain.
14. Supply Chain analytics – new imperative in SCM.

Innovation and disruption are the hallmarks of the technology world !!!
Network with SCM Professionals
